

# T•YARN

## How to prepare a T-shirt

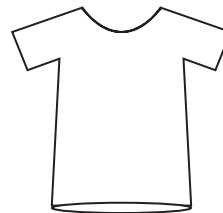

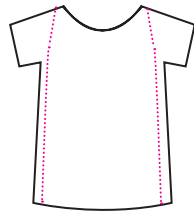

Does it have seams on the sides?

Yes

No

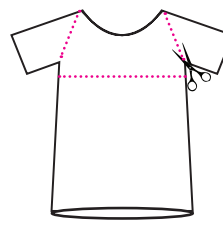

### Step 1:

In order to produce nice T.YARN, we need to have new seams. With a sewing machine, sew right next to the existing seam, from bottom to top. Choose a small stitch, e.g. 1,2-1,8mm.

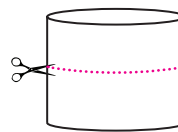

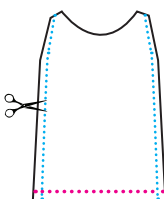

### Step 2:

With a pair of textile-scissors, make sure you cut off the old seam. Cut precisely between the new and the old seam.

### Step 3:

Cut off the seam at the bottom of the shirt.
